

Workbook: Alimentary Canal

Week 5 workbook · BIO 004 Human Anatomy · Dr. Sharilyn Rennie · Solano Community College

A comprehensive workbook on the GI tract from mouth to anus: the wall layers, the mouth and pharynx, the esophagus, the stomach, and the small and large intestines.

How to use this workbook: Read each question carefully and write your answer in the space provided. Work without looking up the answer first. Once you have written your answer, check it against the online workbook by clicking *Reveal* on that question. Star or circle anything you missed and come back to it later in the week.

GI tract wall and overview · 3 questions

Q01 · DOK 1 · Recall

Name the four layers of the GI tract wall from lumen outward.

Q02 · DOK 1 · Recall

What is the enteric nervous system and where in the GI wall does it live?

Q03 · DOK 2 · Apply

Which abdominal GI organs are intraperitoneal and which are retroperitoneal?

Mouth, pharynx, esophagus · 5 questions

Q04 · DOK 1 · Recall

What are the borders of the oral cavity, and what structures are in it?

Q05 · DOK 1 · Recall

Name the four tooth types in an adult dentition and how many of each.

Q06 · DOK 1 · Recall

Describe the tongue and its papillae.

Q07 · DOK 1 · Recall

Name the three regions of the pharynx and which transmit food.

Q08 · DOK 1 · Recall

Describe the esophagus.

Stomach · 5 questions**Q09 · DOK 1 · Recall**

Name the four regions of the stomach.

Q10 · DOK 1 · Recall

What are the lesser and greater curvatures of the stomach, and what attaches to each?

Q11 · DOK 2 · Apply

The stomach has three layers of smooth muscle instead of the usual two. Name them and explain why the third layer matters.

Q12 · DOK 1 · Recall

What are rugae?

Q13 · DOK 1 · Recall

What are gastric pits and gastric glands, and name two cell types found in the glands.

Small intestine · 3 questions**Q14 · DOK 1 · Recall**

Name the three parts of the small intestine in order, and one defining feature of each.

Q15 • DOK 2 • Apply

Name three structural features that increase the absorptive surface area of the small intestine.

Q16 • DOK 1 • Recall

What is a lacteal, and what does it transport?

Large intestine • 4 questions**Q17 • DOK 1 • Recall**

Name the regions of the large intestine in order from where it begins to where it ends.

Q18 • DOK 1 • Recall

Where do the cecum and appendix sit, and what is McBurney's point?

Q19 • DOK 2 • Apply

Name three unique anatomical features of the colon.

Q20 · DOK 1 · Recall

Compare the internal and external anal sphincters by tissue type and control.
