

Workbook: Appendicular Skeleton — Lower Limb

Week 2 workbook • BIO 004 Human Anatomy • Dr. Sharilyn Rennie • Solano Community College

A comprehensive workbook on the lower limb skeleton: the pelvic girdle, the femur, the patella, the tibia and fibula, the tarsals, metatarsals, and phalanges, plus clinical anatomy of the hip and knee.

How to use this workbook: Read each question carefully and write your answer in the space provided. Work without looking up the answer first. Once you have written your answer, check it against the online workbook by clicking *Reveal* on that question. Star or circle anything you missed and come back to it later in the week.

Pelvic girdle • 6 questions

Q01 • DOK 1 • Recall

What bones form the pelvic girdle, and how is it different from the pectoral girdle?

Q02 • DOK 1 • Recall

Each hip bone is formed by the fusion of three bones. Name them, and where they meet.

Q03 • DOK 1 • Recall

What are the major landmarks of the ilium?

Q04 • DOK 1 • Recall

What are the major landmarks of the ischium?

Q05 • DOK 1 • Recall

What are the major landmarks of the pubis?

Q06 • DOK 2 • Compare

Compare the female and male pelvis by structural features relevant to childbirth.

Femur • 4 questions

Q07 • DOK 1 • Recall

Name the proximal features of the femur.

Q08 • DOK 1 • Recall

Name a major feature of the femoral shaft.

Q09 • DOK 1 • Recall

Name the distal features of the femur.

Q10 • DOK 1 • Recall

What kind of bone is the patella, and what does it do?

Tibia and fibula • 4 questions

Q11 • DOK 1 • Recall

Which leg bone is medial and weight-bearing, and which is lateral and not weight-bearing?

Q12 • DOK 1 • Recall

Name the major landmarks of the tibia.

Q13 • DOK 1 • Recall

Name the major landmarks of the fibula.

Q14 · DOK 2 · Apply

Describe how the tibia, fibula, and talus form the ankle joint.

Foot · 4 questions

Q15 · DOK 1 · Recall

Name the seven tarsal bones.

Q16 · DOK 1 · Recall

How are the metatarsals and phalanges of the foot organized?

Q17 · DOK 2 · Apply

Name the arches of the foot and explain what they do.

Q18 · DOK 3 · Reason

In elderly patients, a 'broken hip' usually refers to a fracture of the femoral neck. Predict why this region fractures more easily with age and what makes it dangerous.
