

Workbook: Axial Skeleton — Skull

Week 2 workbook · BIO 004 Human Anatomy · Dr. Sharilyn Rennie · Solano Community College

A comprehensive workbook on the bones of the skull: the cranial bones, the facial bones, the major foramina, the paranasal sinuses, and the special joints of the skull. Memorize the bones first, then walk through the openings.

How to use this workbook: Read each question carefully and write your answer in the space provided. Work without looking up the answer first. Once you have written your answer, check it against the online workbook by clicking *Reveal* on that question. Star or circle anything you missed and come back to it later in the week.
