

Workbook: Lymphatic System

Week 4 workbook · BIO 004 Human Anatomy · Dr. Sharilyn Rennie · Solano Community College

A comprehensive workbook on the anatomy of the lymphatic system: lymph and lymphatic vessels, lymph nodes, the primary and secondary lymphoid organs, and their roles in fluid balance and immunity.

How to use this workbook: Read each question carefully and write your answer in the space provided. Work without looking up the answer first. Once you have written your answer, check it against the online workbook by clicking *Reveal* on that question. Star or circle anything you missed and come back to it later in the week.

Lymph and vessels · 4 questions

Q01 · DOK 1 · Recall

What is lymph, where does it come from, and where does it ultimately go?

Q02 · DOK 1 · Recall

Describe lymphatic capillaries and how they let fluid in.

Q03 · DOK 2 · Apply

What drives lymph flow, given that the system has no pump?

Q04 • DOK 2 • Apply

What does the thoracic duct drain, and where does it empty?

Lymph nodes and lymphoid organs • 6 questions**Q05 • DOK 1 • Recall**

Describe the structure of a lymph node, including how lymph enters and exits.

Q06 • DOK 1 • Recall

What is the function of a lymph node?

Q07 • DOK 1 • Recall

Where is the thymus, what is it, and what does it do?

Q08 • DOK 1 • Recall

Where is the spleen, and what does it do?

Name the major tonsils and where each sits.

What is MALT, and where is it most prominent?

After mastectomy with axillary lymph node removal, the arm on the same side sometimes swells (lymphedema). Predict why and explain using lymphatic anatomy.

A patient has a sore throat and a tender swollen lymph node in the neck. Using node anatomy, explain why the node enlarged.
