

Workbook: Female Reproductive System

Week 6 workbook · BIO 004 Human Anatomy · Dr. Sharilyn Rennie · Solano Community College

A comprehensive workbook on the female reproductive anatomy: the ovaries, the uterine tubes, the uterus, the vagina, the external genitalia, and the breast.

How to use this workbook: Read each question carefully and write your answer in the space provided. Work without looking up the answer first. Once you have written your answer, check it against the online workbook by clicking *Reveal* on that question. Star or circle anything you missed and come back to it later in the week.

Ovaries · 3 questions

Q01 · DOK 1 · Recall

Where do the ovaries sit, and what holds them in place?

Q02 · DOK 1 · Recall

What are the ovaries' two main functions?

Q03 · DOK 1 · Recall

What is a follicle, and what are its developmental stages?

Uterine tubes · 3 questions

Q04 • DOK 1 • Recall

Name the regions of the uterine (fallopian) tube from ovary to uterus.

Q05 • DOK 2 • Apply

What lines the uterine tubes, and how does the lining help an ovulated ovum reach the uterus?

Q06 • DOK 3 • Reason

An ectopic pregnancy is implantation outside the uterus, most often in the ampulla of a uterine tube. Predict why this is dangerous and why it cannot continue as a normal pregnancy.

Uterus • 4 questions**Q07 • DOK 1 • Recall**

Name the regions of the uterus.

Q08 • DOK 1 • Recall

Name the three layers of the uterine wall.

Q09 • DOK 2 • Apply

Compare the two functional layers of the endometrium.

Q10 • DOK 1 • Recall

What is the normal position of the uterus relative to the bladder and rectum?

Vagina and external genitalia • 2 questions**Q11 • DOK 1 • Recall**

Describe the vagina.

Q12 • DOK 1 • Recall

Name the external female genital structures collectively known as the vulva.

Breast • 1 question**Q13 • DOK 1 • Recall**

Describe the structure of the female breast.
