

Workbook: Male Reproductive System

Week 6 workbook • BIO 004 Human Anatomy • Dr. Sharilyn Rennie • Solano Community College

A comprehensive workbook on the male reproductive anatomy: the testes, the duct system (epididymis, ductus deferens, ejaculatory duct, urethra), the accessory glands, and the external genitalia.

How to use this workbook: Read each question carefully and write your answer in the space provided. Work without looking up the answer first. Once you have written your answer, check it against the online workbook by clicking *Reveal* on that question. Star or circle anything you missed and come back to it later in the week.

Testes and scrotum • 3 questions

Q01 • DOK 1 • Recall

What is the scrotum, and why does it sit outside the body?

Q02 • DOK 1 • Recall

Describe the structure of a testis.

Q03 • DOK 1 • Recall

Name two key cell types in or near the seminiferous tubules and what each does.

Duct system • 3 questions

Q04 · DOK 2 · Apply

Trace the path of a sperm from where it is made to where it leaves the body.

Q05 · DOK 1 · Recall

What is the epididymis, and what happens there?

Q06 · DOK 1 · Recall

Describe the ductus (vas) deferens.

Accessory glands · 4 questions**Q07 · DOK 1 · Recall**

Where are the seminal vesicles, and what do they contribute?

Q08 · DOK 1 · Recall

Where is the prostate, and what does it contribute?

Q09 • DOK 1 • Recall

Where are the bulbourethral (Cowper's) glands, and what do they contribute?

Q10 • DOK 1 • Recall

What is semen made of, by rough composition?

External genitalia • 2 questions**Q11 • DOK 1 • Recall**

Describe the internal structure of the penis.

Q12 • DOK 1 • Recall

What is the foreskin (prepuce)?
