Respiratory System, Part 1

Competencies 97 to 99: airway map, nose and pharynx, larynx. Cadaver beside model. Fill in as we go.

Name _____

A. Nose, pharynx, larynx: the start of the airway (cadaver) COMPETENCY 97, 98

Cadaver, midsagittal head and neck

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____

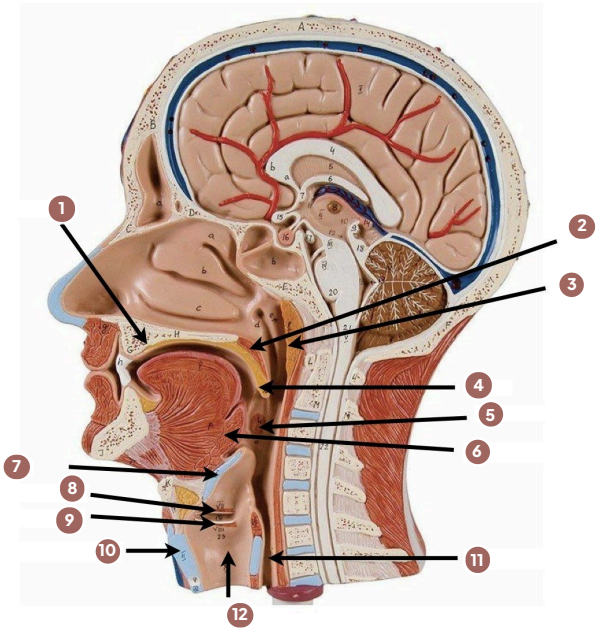

FILL IN

Air only region: _____

Air and food: _____

Lower tract begins at the _____

B. Palate, tonsils and the three regions of the pharynx (model) COMPETENCY 98, 113

Model, midsagittal head: palate, tonsils, larynx

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____

Lymphatic System

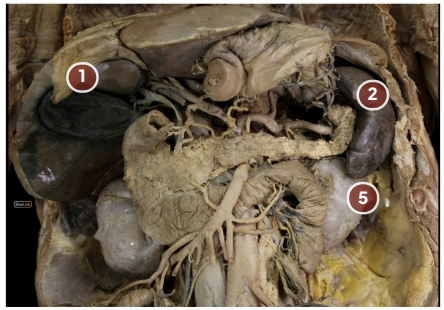

Competencies 105 to 108: the route lymph takes, vessel and node structure, primary and secondary organs, disorders.

Name _____

A. The route lymph takes (draw it) and the spleen (cadaver) COMPETENCY 105, 107

ONE-WAY ROUTE, IN ORDER

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____

Cadaver, upper abdomen: find the spleen

FILL IN

Lymph is _____

Right lymphatic duct drains _____

Thoracic duct drains _____

Lymph moves with no pump by _____

1 _____

2 _____

5 _____

SPLEEN

Sits _____

White pulp: _____

Red pulp: _____

Extra notes and drawings

B. Lymphatic capillary, collecting vessel, lymph node (draw it) COMPETENCY 106

LYMPH NODE, OUTSIDE IN

Capsule: _____

Cortex: _____

Medulla: _____

Afferent vessels enter _____

Efferent vessels leave _____

Hilum: _____

CAPILLARY AND VESSEL

Lymphatic capillary wall: _____

Collecting vessels have _____

Lacteals are lymphatic capillaries in _____

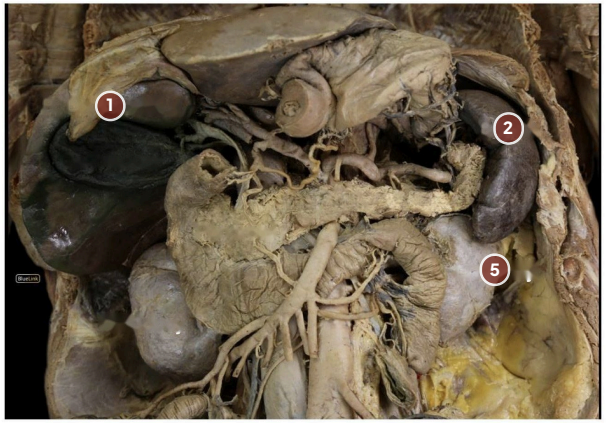

DRAW: ONE LYMPH NODE WITH CAPSULE, CORTEX, MEDULLA, AFFERENT VESSELS ENTERING AND EFFERENT VESSELS LEAVING THE HILUM

Extra notes and drawings

Lymphatic System STRUCTURE NOTES

A. The route lymph takes (draw it) and the spleen (cadaver) · Competency 105, 107 · one card per numbered structure, same lines as the slide. Write the name, fill each line as we go; muscles show the bones with origin (rust) and insertion (blue) shaded.

Name _____

Digestive System: the GI map

Build this as we go. Every stop on the tube in order, and every organ that pours into it. Competencies 109 to 125. Name _____

THE TUBE: FOLLOW THE BITE

1. Mouth (oral cavity)
Epithelium: _____
Happens here: _____
Boundaries: _____

↓

2. Pharynx
Food uses: _____
Sealed off: _____
Gate out: _____

↓

3. Esophagus
Epithelium: _____
Outer layer: _____
Through the diaphragm at: _____
Gate out: _____

↓

4. Stomach
Regions in order: _____
Epithelium: _____
Extra muscle layer: _____
Folds: _____
Gate out: _____

↓

5. Small intestine
Duodenum, 25 cm: _____
Jejunum, 1 m: _____
Ileum, 2 m: _____
Surface: _____
Gate out: _____

↓

6. Large intestine
In order: _____
Only here: _____
Epithelium: _____
Job: _____

↓

7. Rectum and anal canal
Rectum: _____
Anal canal lining near the anus: _____
Two gates: _____

ACCESSORY ORGANS: WHAT POURS INTO THE TUBE, AND WHERE

Salivary glands, into the mouth
Parotid duct opens: _____
Submandibular duct opens: _____
Sublingual ducts open: _____

Teeth and tongue
Tongue muscles: _____
Papillae without taste buds: _____
Adult teeth: _____

Liver, into the duodenum by bile
Lobes: _____
Lobule: _____
Bile path: _____

Gallbladder
Regions: _____
Its duct: _____
Job: _____

Pancreas, into the duodenum
Regions: _____
Main duct joins the _____
Accessory duct opens at the _____
Acini (exocrine) and _____

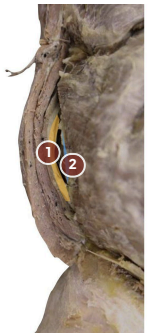

DRAW: THE WHOLE CANAL IN THE TORSO, DIAPHRAGM AT THE TOP, ACCESSORY ORGANS BESIDE IT, A RING AT EVERY SPHINCTER

Digestive System, Part I

Competencies 109 to 114, 120, 121: peritoneum and folds, retroperitoneal organs, the gut wall and its sphincters, mouth, salivary glands, tongue, esophagus.

Name _____

A. Peritoneum and the omenta (cadaver) COMPETENCY 111

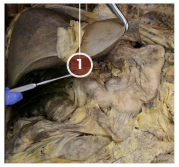

Cadaver, peritoneum: parietal and visceral layers

1 _____
2 _____

Cadaver, greater omentum

1 _____

Cadaver, lesser omentum

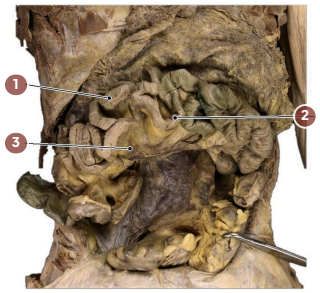

1 _____

FIVE FOLDS: WHAT EACH ONE CONNECTS

Greater omentum: _____
Lesser omentum: _____
Falciform ligament: _____
Mesentery: _____
Mesocolon: _____

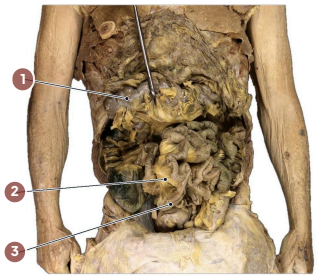

Extra notes and drawings

B. Mesentery, and what sits behind the peritoneum (cadaver) COMPETENCY 111, 112

Cadaver, mesentery of the small intestine

1 _____
2 _____
3 _____

Cadaver, transverse colon lifted

1 _____
2 _____
3 _____

FILL IN

Intraperitoneal: _____
Retroperitoneal: _____
Retroperitoneal organs: _____
On a mesocolon: _____

Extra notes and drawings

Blood Vessels, Part II: Pelvis and Lower Limb

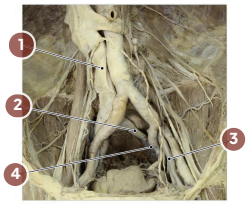

Competency 127: the iliac vessels, the femoral triangle, one artery renamed at each landmark down to the foot, the four pulse points, and the deep and superficial veins.

Name _____

A. Pelvis: the iliac arteries and veins (cadaver) COMPETENCY 127

Cadaver, iliac arteries

Cadaver, iliac veins

1 _____
2 _____
3 _____
4 _____

1 _____
2 _____
3 _____
4 _____

FILL IN

Common iliac splits into _____

Internal iliac supplies _____

External iliac becomes the femoral artery at the _____

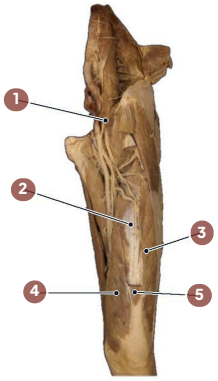

Veins run with the arteries and _____

Common iliac veins unite at L5 to form the _____

B. Thigh: the femoral triangle and the femoral artery (cadaver) COMPETENCY 127

Cadaver, femoral triangle

Cadaver, anterior thigh, deep

1 _____
2 _____
3 _____

1 _____
2 _____
3 _____
4 _____
5 _____

FILL IN

Triangle borders: _____

Lateral to medial: _____

Femoral pulse: _____

Deep femoral artery (profunda) supplies _____

Femoral artery runs down the _____

Becomes the popliteal artery at the _____

Blood Vessels, Part II: Pelvis and Lower Limb

Competency 127: the iliac vessels, the femoral triangle, one artery renamed at each landmark down to the foot, the four pulse points, and the deep and superficial veins.

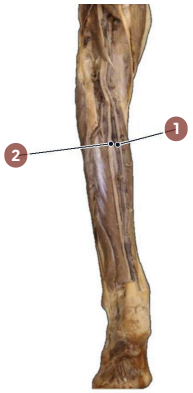

Name _____

C. Leg and foot: the popliteal artery splits (cadaver) COMPETENCY 127

Cadaver, anterior leg: anterior tibial artery

1 _____
2 _____
3 _____

Cadaver, deep posterior leg: posterior tibial artery

1 _____
2 _____

FILL IN

Popliteal pulse: _____

Below the knee, popliteal splits into _____

Anterior tibial runs with the _____

Posterior tibial runs with the _____

Fibular artery branches from the _____

Dorsalis pedis pulse: _____

Posterior tibial pulse: _____

D. Veins of the lower limb (draw it) COMPETENCY 127

DEEP VEINS

Run with the arteries and share their names: _____

Pushed upward by the _____

SUPERFICIAL VEINS

Great saphenous: starts _____

Runs up the _____

Empties into the _____

Small saphenous: starts _____

Runs up the _____

Empties into the _____

Longest vein in the body: _____

CLINICAL

Varicose veins: _____

Deep vein thrombosis: _____

DRAW: THE FRONT OF ONE LOWER LIMB WITH THE GREAT SAPHENOUS VEIN FROM THE MEDIAL MALLEOLUS TO THE FEMORAL VEIN, AND THE BACK WITH THE SMALL SAPHENOUS VEIN FROM THE LATERAL MALLEOLUS TO THE POPLITEAL VEIN. MARK THE TWO MALLEOLI.
