

Drawing sheet · Joints

The drawing frames from your pre-work, on a page of their own. Draw on it on a tablet, or print it and draw by hand. Either way, draw from memory first, then open your notes and correct yourself in a second color.

Module 2 · 4 of 4

Bring this to class

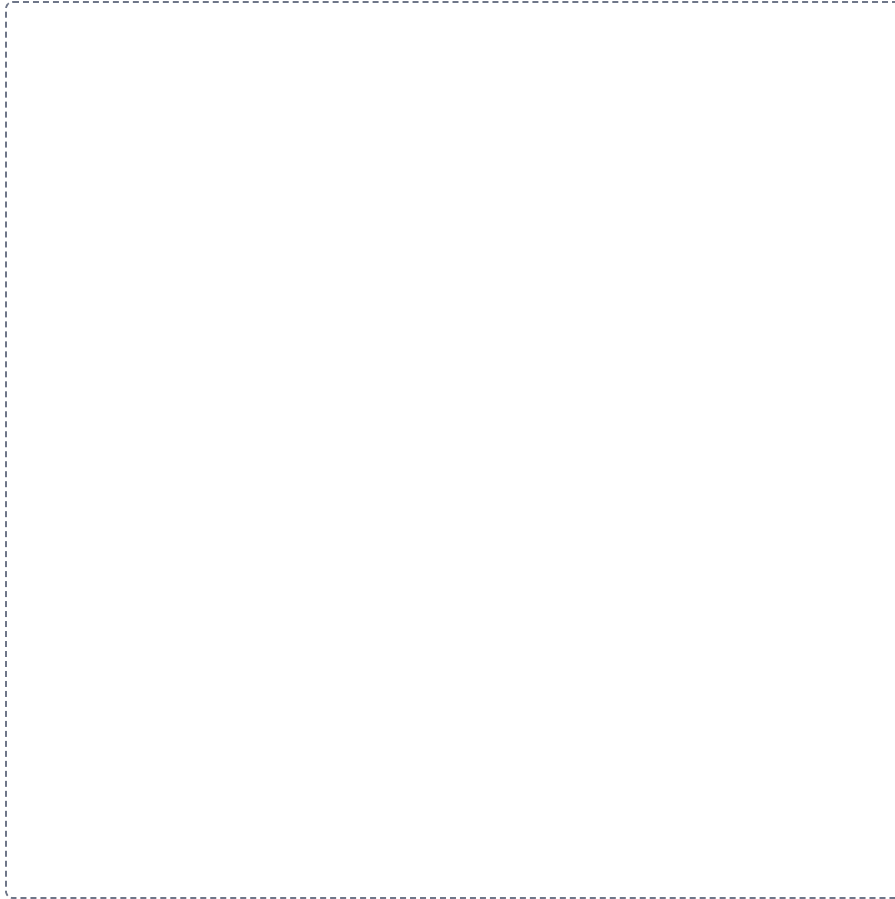

Mini visual sheet

Each frame tells you what to draw in it and what to label. Do them with your notes closed, then open your notes and correct yourself in a second color. Draw straight onto this sheet. If a frame is too small for your handwriting, draw that one in your notebook instead and write the frame number at the top of the page so you can find it again.

Structure crossed with function

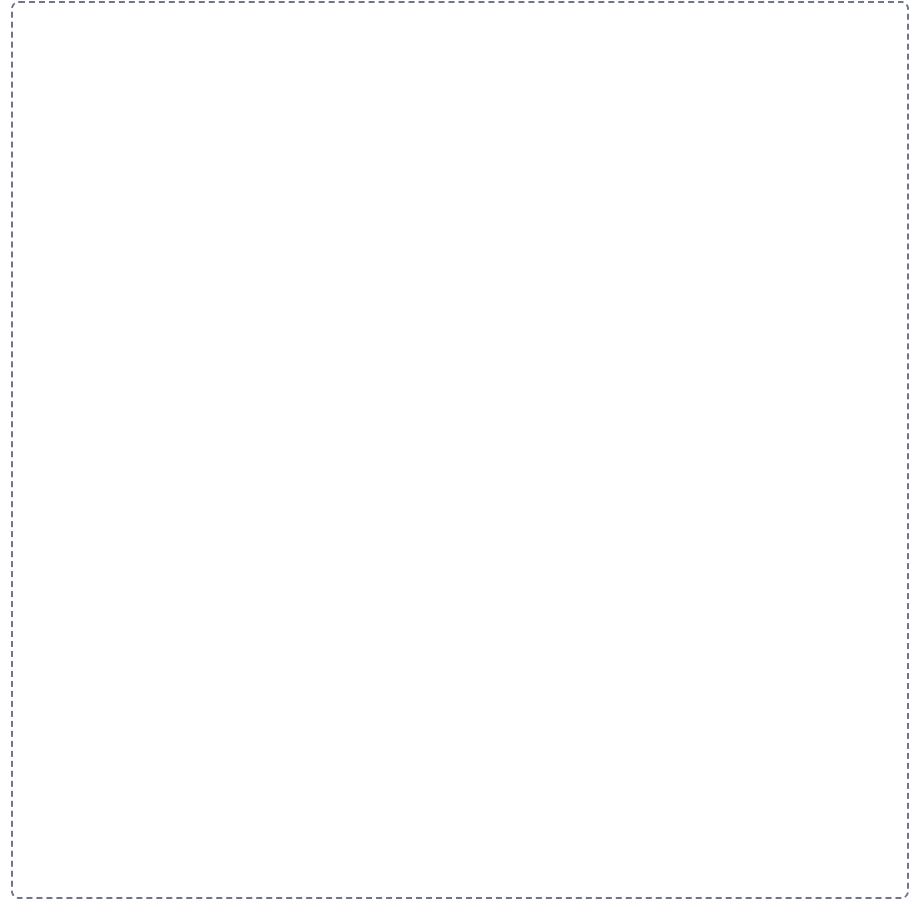

GRID

Draw a grid. List the things being compared down the left side, write the features you are comparing them on across the top, and fill in every box.

**Fibrous joints**

HUB

Put the main structure in the middle of the frame. Draw everything that belongs to it around the outside, label each one, and run a line from each back to the middle.

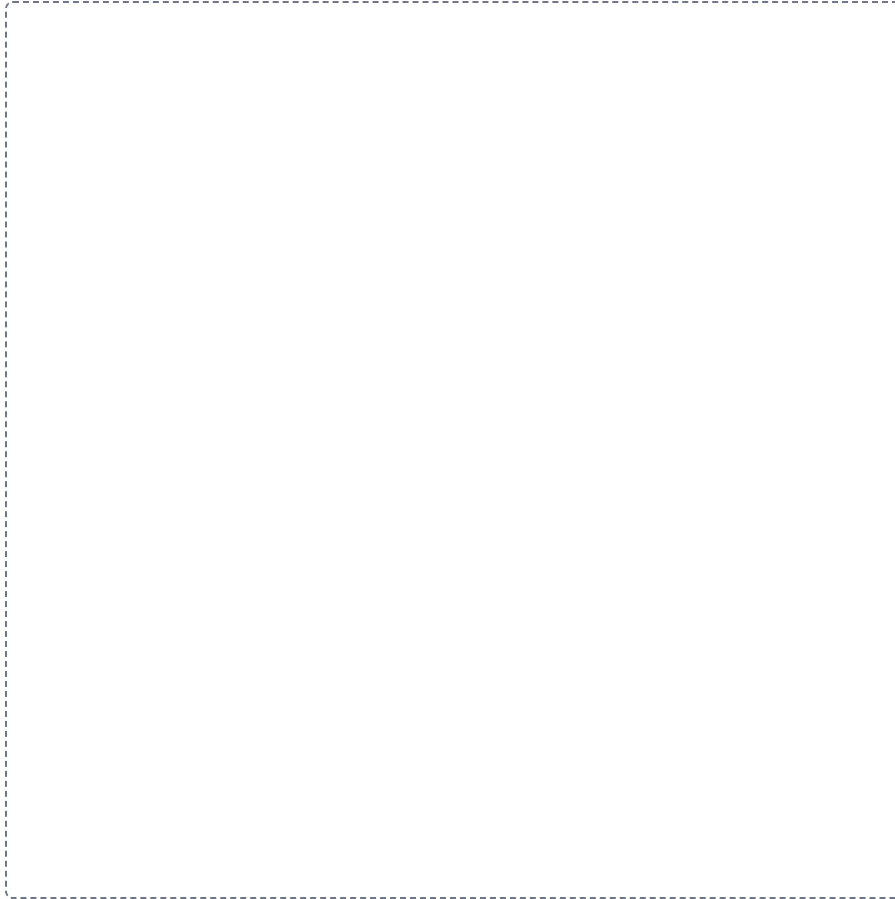

12-3

Synchondrosis against symphysis

SPLIT

Draw a line down the middle of the frame. Put one on the left and the other on the right. Draw and label both, then underneath write the one difference that tells them apart.

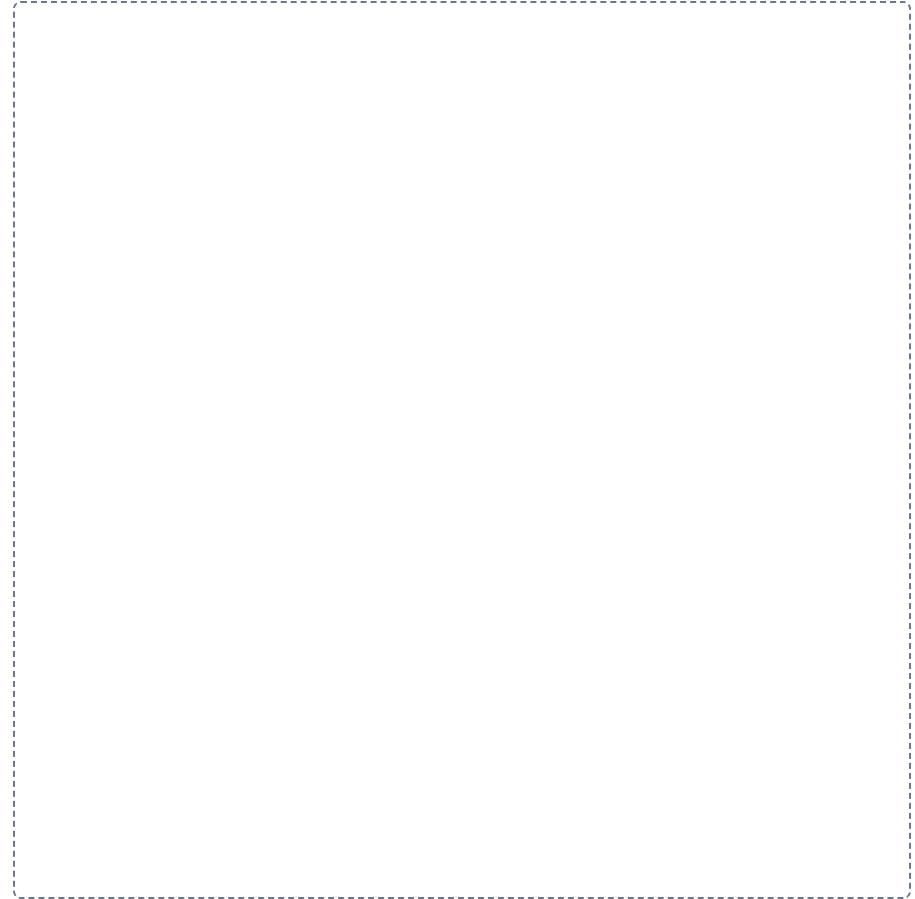

12-4

A synovial joint in section

HUB

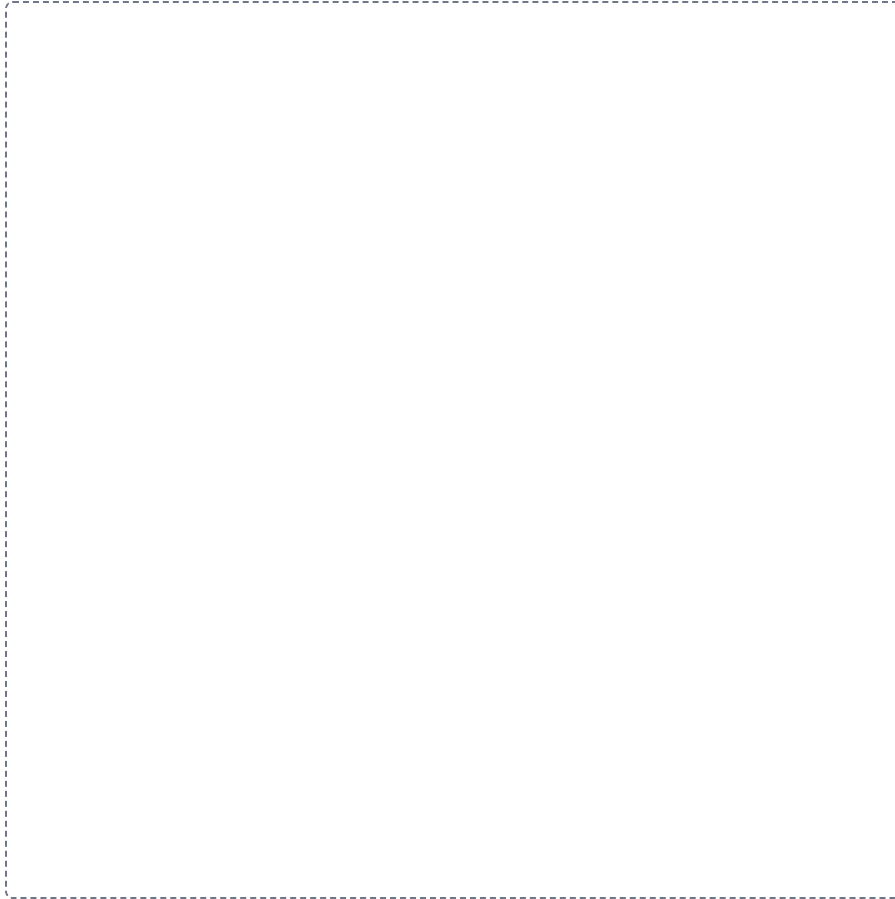

Put the main structure in the middle of the frame. Draw everything that belongs to it around the outside, label each one, and run a line from each back to the middle.

The six synovial types

GRID

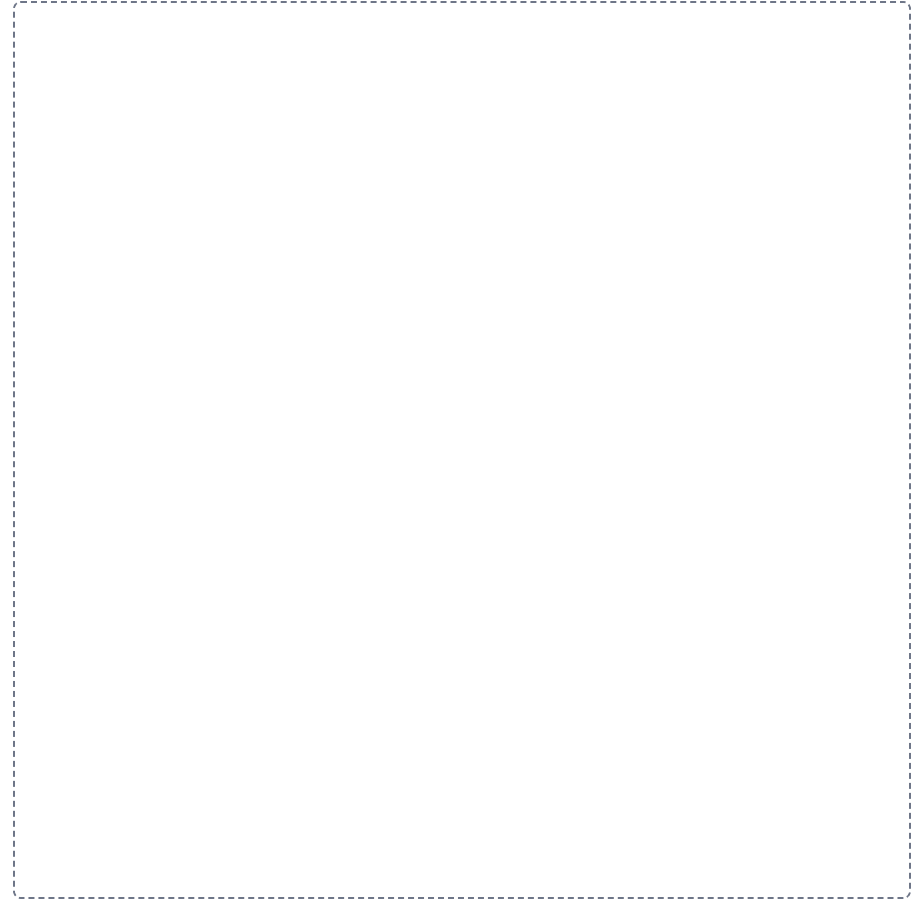

Draw a grid. List the things being compared down the left side, write the features you are comparing them on across the top, and fill in every box.

The movements

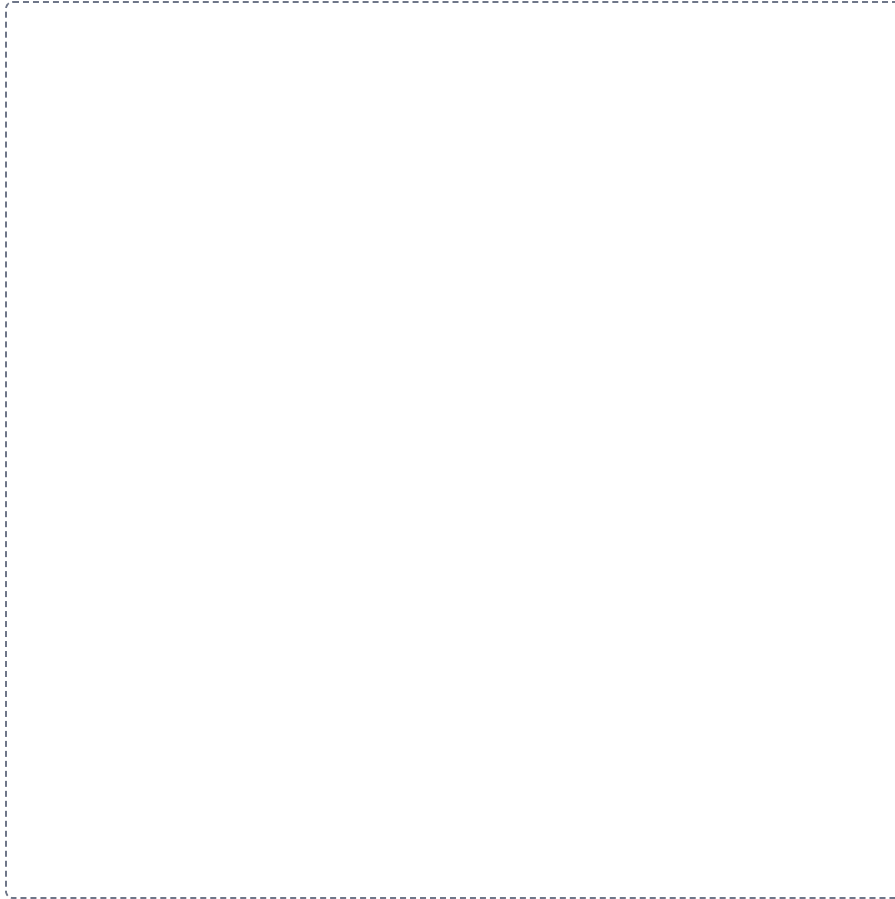

GRID

Draw a grid. List the things being compared down the left side, write the features you are comparing them on across the top, and fill in every box.

Osteoarthritis against rheumatoid arthritis**SPLIT**

Draw a line down the middle of the frame. Put one on the left and the other on the right. Draw and label both, then underneath write the one difference that tells them apart.
