

Drawing sheet · Module 5 Integration

The drawing frames from your pre-work, on a page of their own. Draw on it on a tablet, or print it and draw by hand. Either way, draw from memory first, then open your notes and correct yourself in a second color.

Module 5 · 5 of 5

Bring this to class

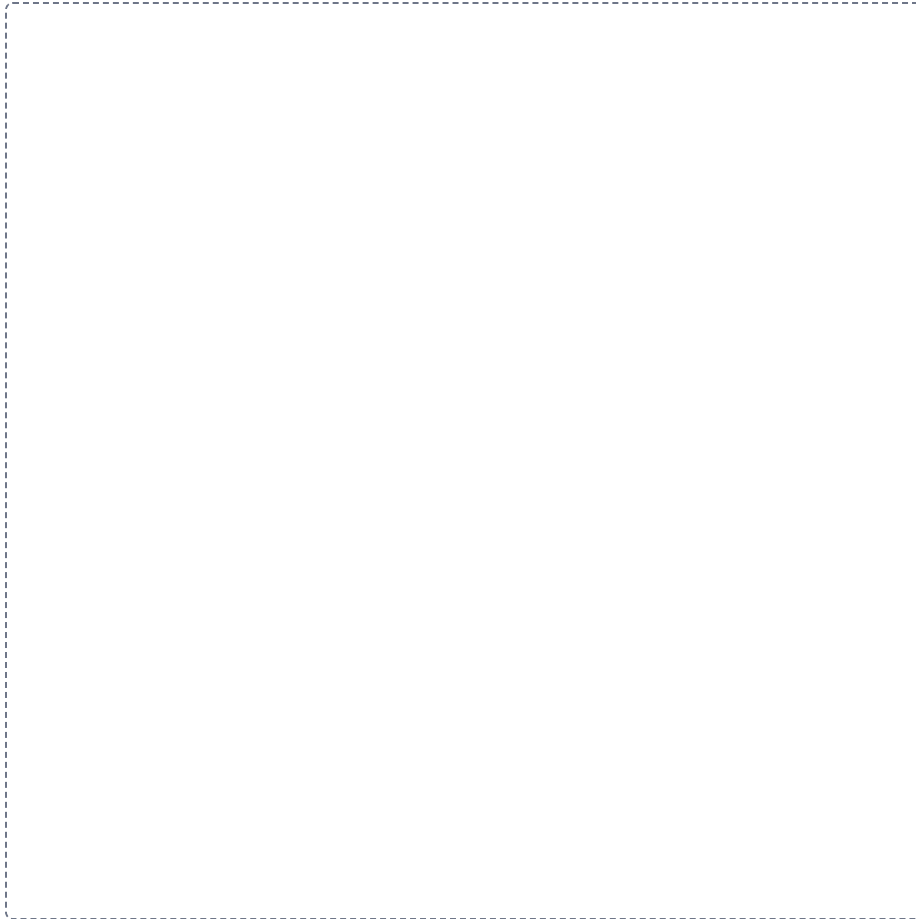

Mini visual sheet

Each frame tells you what to draw in it and what to label. Do them with your notes closed, then open your notes and correct yourself in a second color. Draw straight onto this sheet. If a frame is too small for your handwriting, draw that one in your notebook instead and write the frame number at the top of the page so you can find it again.

The whole nervous system on one page

HUB

Put the main structure in the middle of the frame. Draw everything that belongs to it around the outside, label each one, and run a line from each back to the middle.

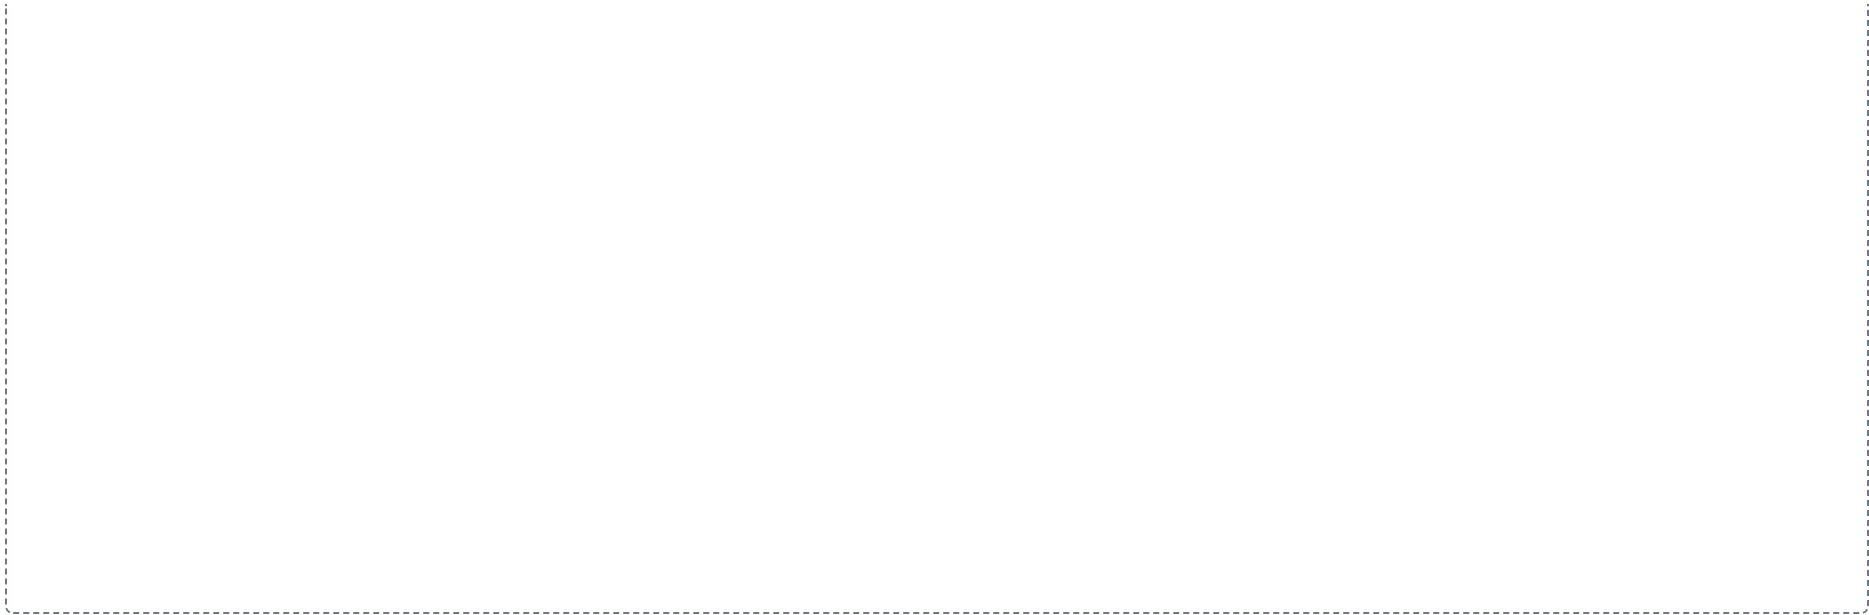

One stimulus, all the way through

CHAIN

Draw the steps left to right with an arrow between each one. Label every step, and on each arrow write what happens to get to the next.

A large dashed rectangular box intended for drawing a flowchart. The box is empty, with a thin dashed border, and occupies the central portion of the page below the instructions.

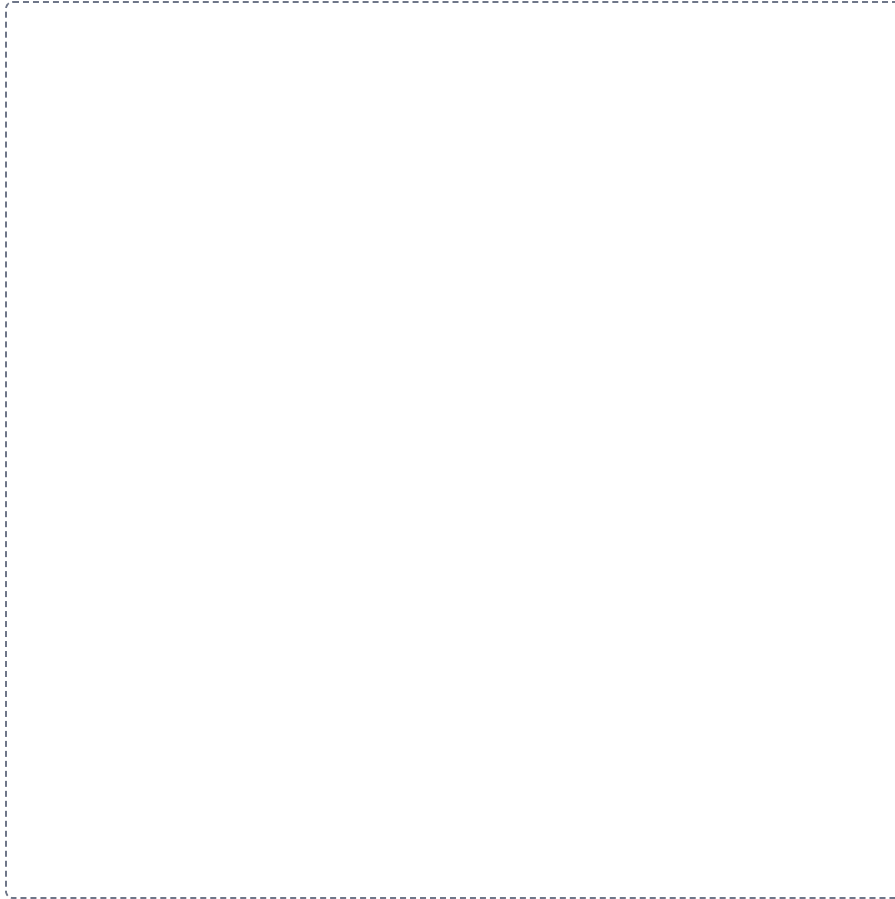

15-3

CNS against PNS, every term that changes

SPLIT

Draw a line down the middle of the frame. Put one on the left and the other on the right. Draw and label both, then underneath write the one difference that tells them apart.

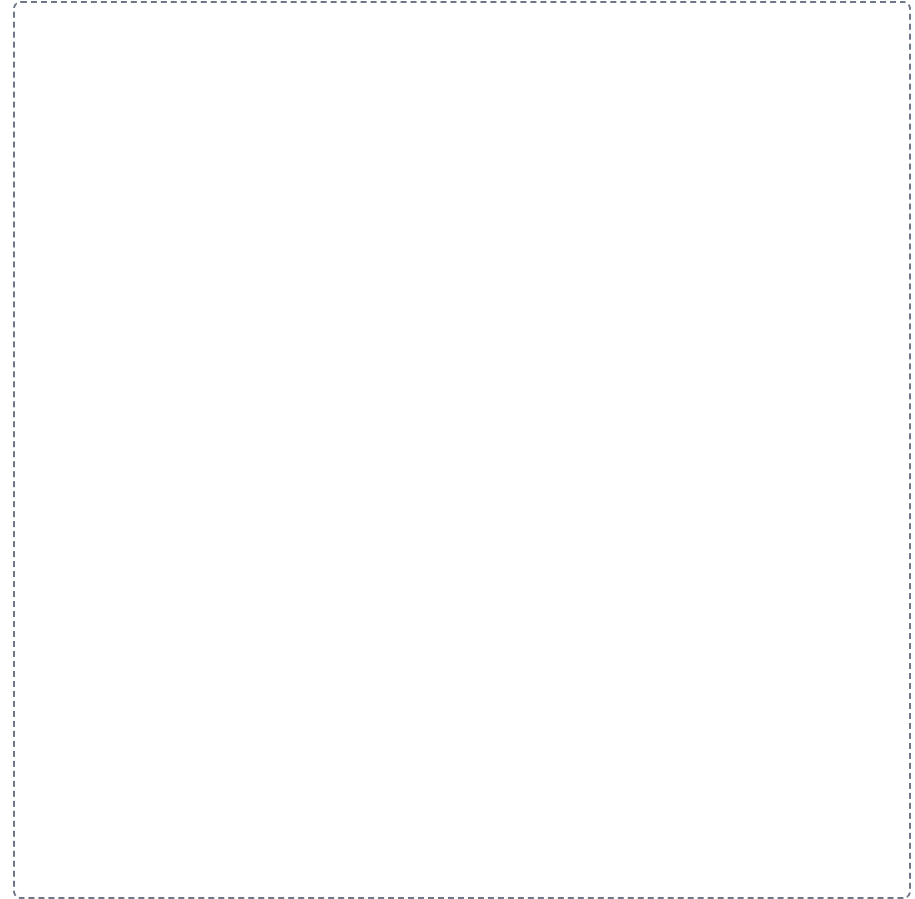

15-4

Where every cell body sits

GRID

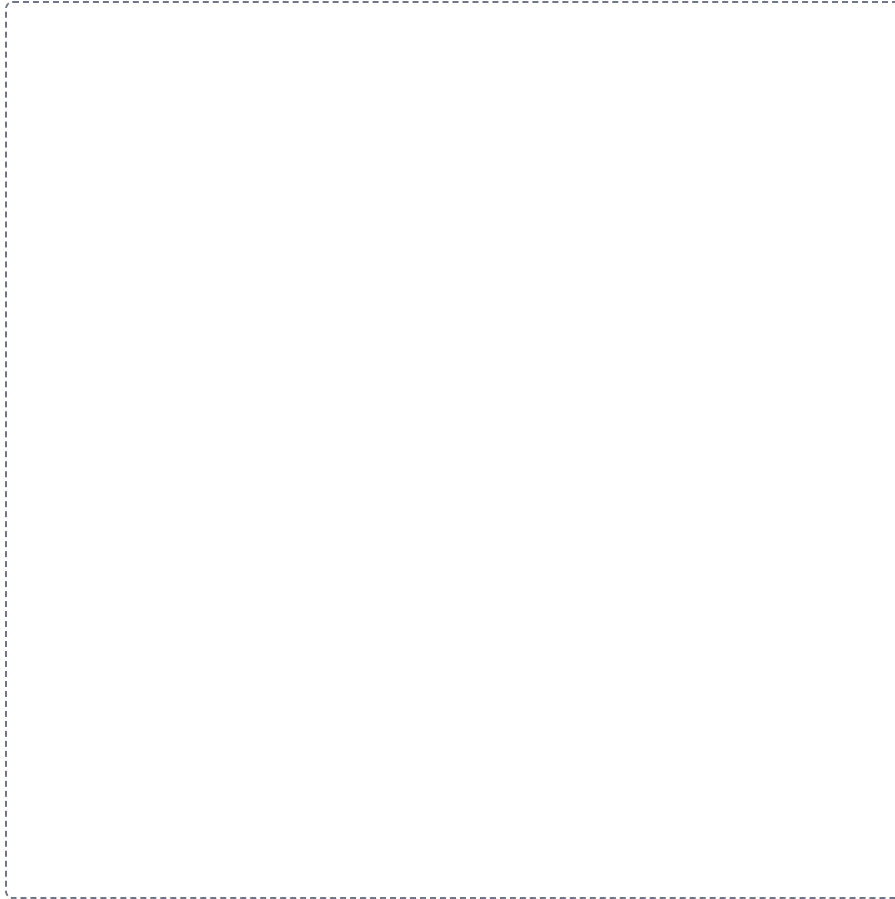

Draw a grid. List the things being compared down the left side, write the features you are comparing them on across the top, and fill in every box.

From the scalp inward to the neuron

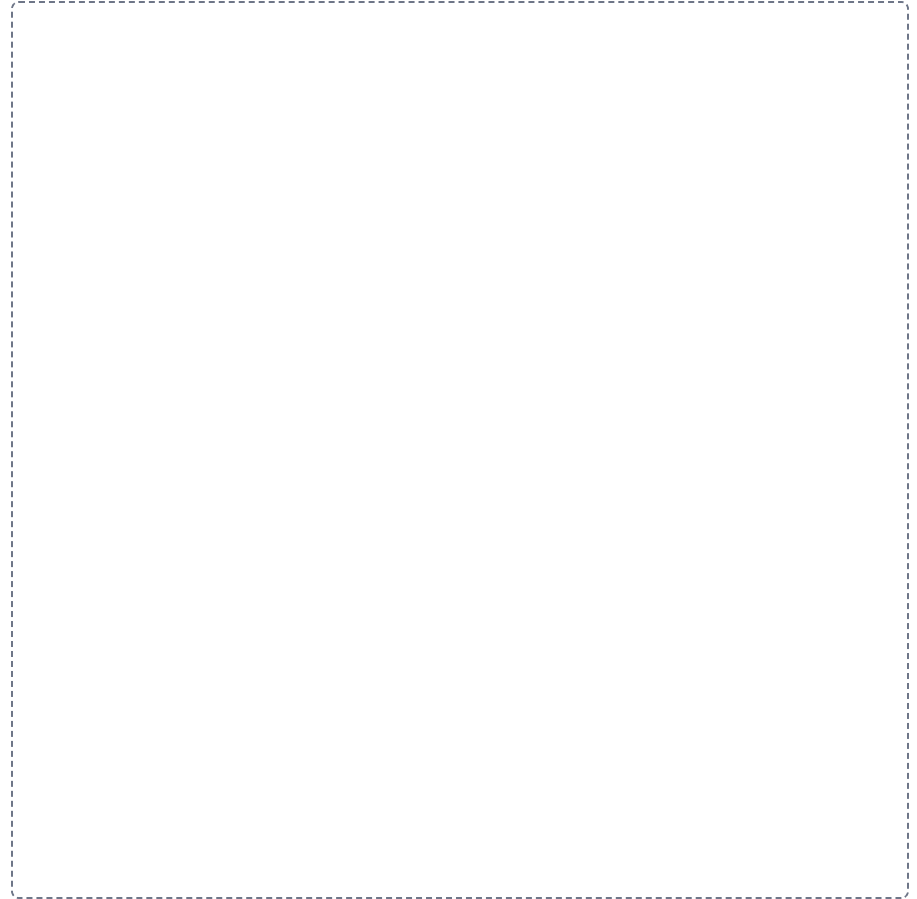

LADDER

Draw the levels in order down the frame, the first one at the top. Label each level and write one line saying how it differs from the level above it.

**Cranial nerve nuclei by brainstem region**

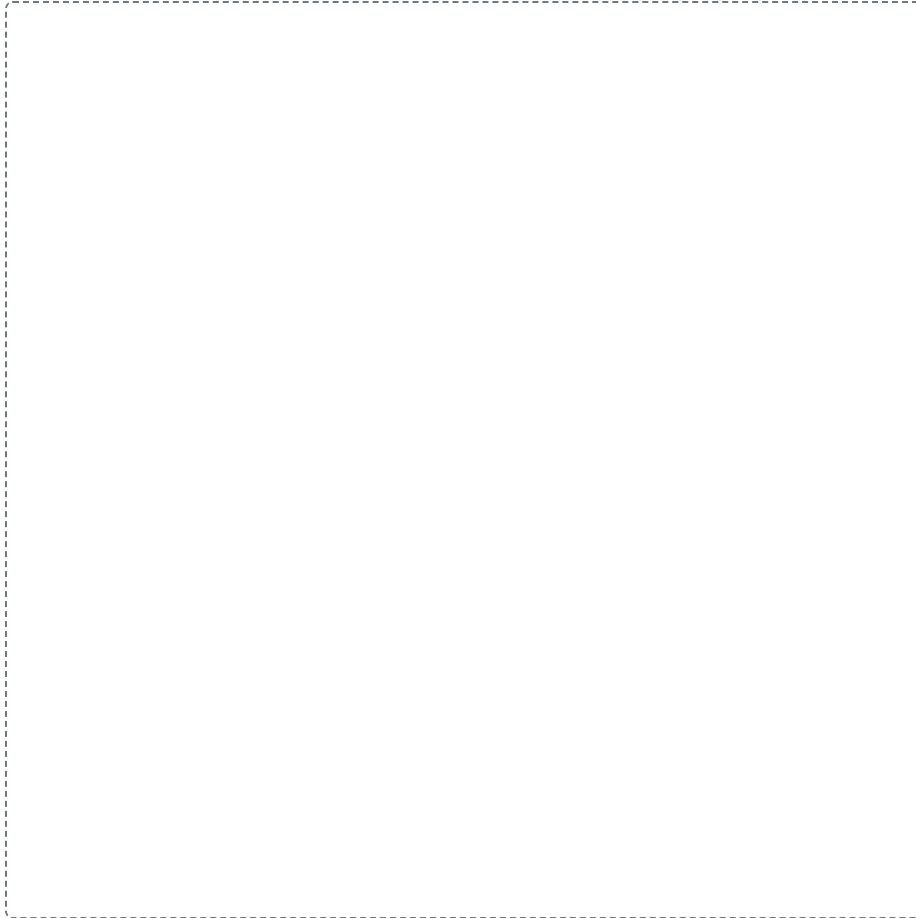

GRID

Draw a grid. List the things being compared down the left side, write the features you are comparing them on across the top, and fill in every box.

Six lesions and the deficits they name**GRID**

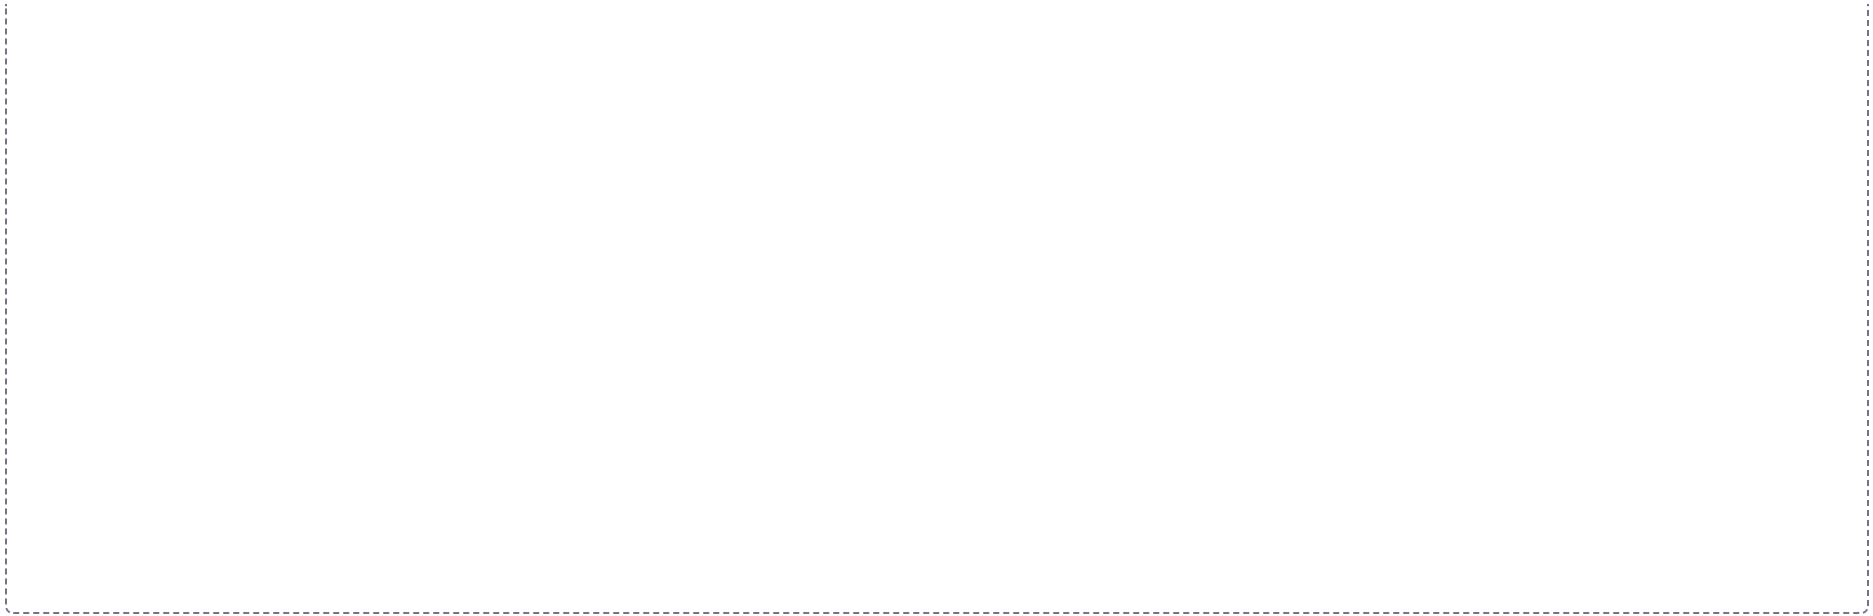

Draw a grid. List the things being compared down the left side, write the features you are comparing them on across the top, and fill in every box.

CSF, choroid plexus back to the blood

CHAIN

Draw the steps left to right with an arrow between each one. Label every step, and on each arrow write what happens to get to the next.
