

Drawing sheet · Nervous Tissue and Neuronal Integration

The drawing frames from your pre-work, on a page of their own. Draw on it on a tablet, or print it and draw by hand. Either way, draw from memory first, then open your notes and correct yourself in a second color.

Module 5 · 1 of 5

Bring this to class

Mini visual sheet

Each frame tells you what to draw in it and what to label. Do them with your notes closed, then open your notes and correct yourself in a second color. Draw straight onto this sheet. If a frame is too small for your handwriting, draw that one in your notebook instead and write the frame number at the top of the page so you can find it again.

The nervous system and its divisions

HUB

Put the main structure in the middle of the frame. Draw everything that belongs to it around the outside, label each one, and run a line from each back to the middle.

The neuron

HUB

Put the main structure in the middle of the frame. Draw everything that belongs to it around the outside, label each one, and run a line from each back to the middle.

15-3

Classifying neurons, twice

GRID

Draw a grid. List the things being compared down the left side, write the features you are comparing them on across the top, and fill in every box.

15-4

The six neuroglia

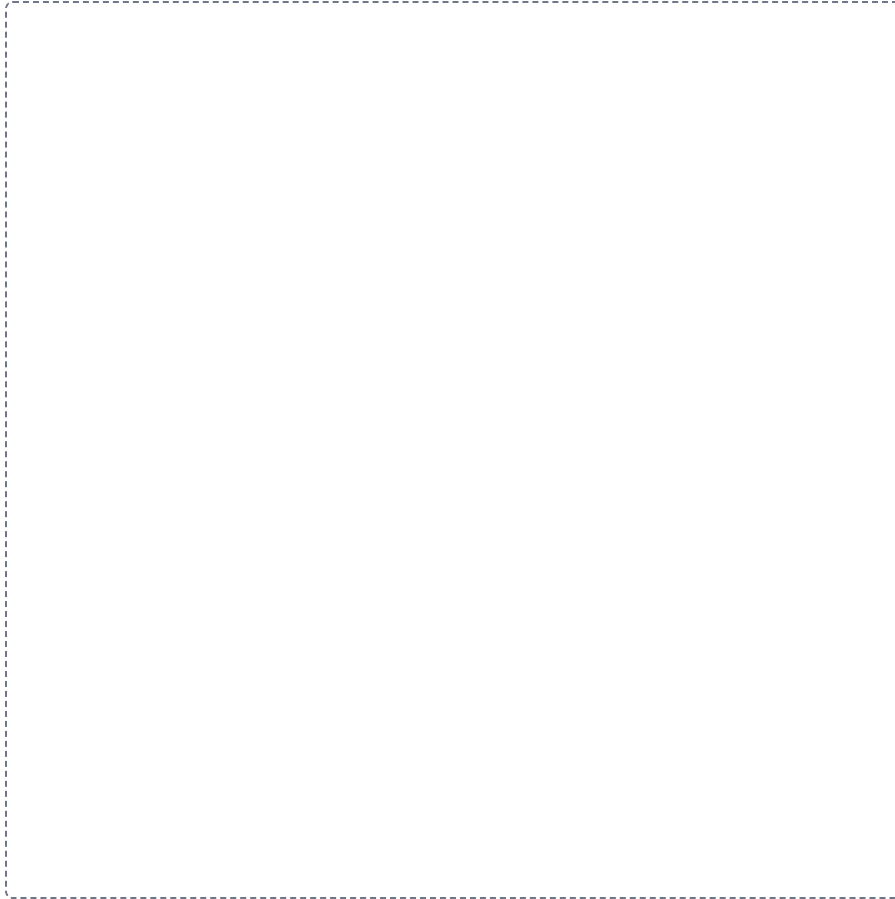

GRID

Draw a grid. List the things being compared down the left side, write the features you are comparing them on across the top, and fill in every box.

PNS myelination against CNS myelination**SPLIT**

Draw a line down the middle of the frame. Put one on the left and the other on the right. Draw and label both, then underneath write the one difference that tells them apart.

**Gray matter against white matter****SPLIT**

Draw a line down the middle of the frame. Put one on the left and the other on the right. Draw and label both, then underneath write the one difference that tells them apart.

Tract, nerve, nucleus, ganglion**GRID**

Draw a grid. List the things being compared down the left side, write the features you are comparing them on across the top, and fill in every box.

The reflex arc, five components

CHAIN

Draw the steps left to right with an arrow between each one. Label every step, and on each arrow write what happens to get to the next.
