Blood Vessels, Part I: Abdomen

Competency 126: the abdominal aorta and its branches, the inferior vena cava and its tributaries, and the hepatic portal system, on the cadaver and the model.

Name _____

A. Abdominal aorta: the three unpaired branches (cadaver and model) COMPETENCY 126

Cadaver, abdominal aorta and branches

1 _____
2 _____
3 _____
4 _____
5 _____
6 _____
7 _____

FILL IN

Enters the abdomen at _____

Unpaired, top to bottom: _____

Celiac trunk splits into _____

Superior mesenteric feeds _____

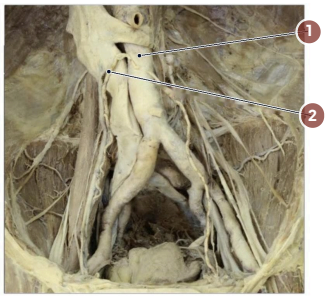

Inferior mesenteric feeds _____

Model, celiac trunk and its branches

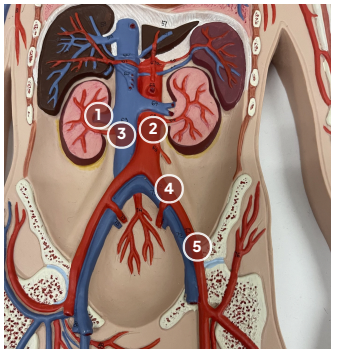

1 _____
2 _____
3 _____
4 _____
5 _____
6 _____
7 _____

B. Paired branches, and where the aorta ends (cadaver and model) COMPETENCY 126

Cadaver, aorta and the gonadal arteries

1 _____
2 _____

Model, aorta, vena cava and the iliac vessels

1 _____
2 _____
3 _____
4 _____
5 _____

FILL IN

Paired branches, top to bottom: _____

Renal arteries leave at about _____

Gonadal arteries are long because _____

Ends at L4 by splitting into the _____

L4 is the level of the _____

5 _____

FILL IN

IVC forms at L5 from the _____

Lies to the _____

Through the diaphragm at _____

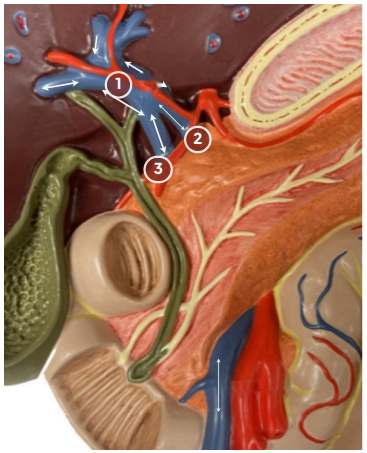

Right gonadal vein drains to _____

Left gonadal vein drains to _____

Hepatic veins enter _____

No vein from the gut enters the IVC directly because _____

D. The hepatic portal system: the detour through the liver (model) COMPETENCY 126

Model, hepatic portal system

1 _____
2 _____
3 _____

GLUCOSE, VILLUS TO RIGHT ATRIUM

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____

FILL IN

Portal vein forms behind the pancreas from _____

A portal system has _____

Portal vein carries blood _____

Blocked liver (cirrhosis) backs blood up into _____

Blood Vessels, Part II: Pelvis and Lower Limb

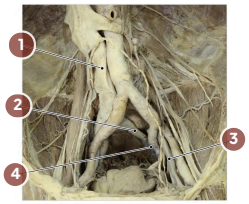

Competency 127: the iliac vessels, the femoral triangle, one artery renamed at each landmark down to the foot, the four pulse points, and the deep and superficial veins.

Name _____

A. Pelvis: the iliac arteries and veins (cadaver) COMPETENCY 127

Cadaver, iliac arteries

Cadaver, iliac veins

1 _____
2 _____
3 _____
4 _____

1 _____
2 _____
3 _____
4 _____

FILL IN

Common iliac splits into _____

Internal iliac supplies _____

External iliac becomes the femoral artery at the _____

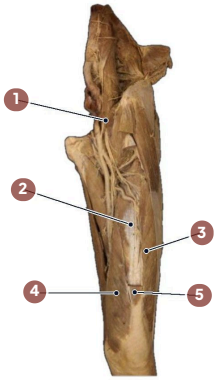

Veins run with the arteries and _____

Common iliac veins unite at L5 to form the _____

B. Thigh: the femoral triangle and the femoral artery (cadaver) COMPETENCY 127

Cadaver, femoral triangle

Cadaver, anterior thigh, deep

1 _____
2 _____
3 _____

1 _____
2 _____
3 _____
4 _____
5 _____

FILL IN

Triangle borders: _____

Lateral to medial: _____

Femoral pulse: _____

Deep femoral artery (profunda) supplies _____

Femoral artery runs down the _____

Becomes the popliteal artery at the _____

Blood Vessels, Part II: Pelvis and Lower Limb

Competency 127: the iliac vessels, the femoral triangle, one artery renamed at each landmark down to the foot, the four pulse points, and the deep and superficial veins.

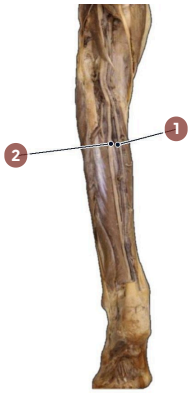

Name _____

C. Leg and foot: the popliteal artery splits (cadaver) COMPETENCY 127

Cadaver, anterior leg: anterior tibial artery

1 _____
2 _____
3 _____

Cadaver, deep posterior leg: posterior tibial artery

1 _____
2 _____

FILL IN

Popliteal pulse: _____

Below the knee, popliteal splits into _____

Anterior tibial runs with the _____

Posterior tibial runs with the _____

Fibular artery branches from the _____

Dorsalis pedis pulse: _____

Posterior tibial pulse: _____

D. Veins of the lower limb (draw it) COMPETENCY 127

DEEP VEINS

Run with the arteries and share their names: _____

Pushed upward by the _____

SUPERFICIAL VEINS

Great saphenous: starts _____

Runs up the _____

Empties into the _____

Small saphenous: starts _____

Runs up the _____

Empties into the _____

Longest vein in the body: _____

CLINICAL

Varicose veins: _____

Deep vein thrombosis: _____

DRAW: THE FRONT OF ONE LOWER LIMB WITH THE GREAT SAPHENOUS VEIN FROM THE MEDIAL MALLEOLUS TO THE FEMORAL VEIN, AND THE BACK WITH THE SMALL SAPHENOUS VEIN FROM THE LATERAL MALLEOLUS TO THE POPLITEAL VEIN. MARK THE TWO MALLEOLI.
