

Workbook: Autonomic Nervous System

Week 8 workbook • BIO 004 Human Anatomy • Dr. Sharilyn Rennie • Solano Community College

A comprehensive workbook on the anatomy of the autonomic nervous system: the sympathetic and parasympathetic divisions, their general effects, the two-neuron motor pathway, and the major autonomic ganglia.

How to use this workbook: Read each question carefully and write your answer in the space provided. Work without looking up the answer first. Once you have written your answer, check it against the online workbook by clicking *Reveal* on that question. Star or circle anything you missed and come back to it later in the week.

Overview • 2 questions

Q01 • DOK 1 • Recall

Name the two divisions of the ANS and describe what each generally does.

Q02 • DOK 1 • Recall

How is the autonomic motor pathway different from the somatic motor pathway?

Sympathetic division • 3 questions

Q03 • DOK 1 • Recall

Where does the sympathetic division originate, and what is its alternative name?

Q04 • DOK 1 • Recall

Where are sympathetic ganglia located, and what is the sympathetic chain?

Q05 • DOK 2 • Apply

Compare sympathetic preganglionic and postganglionic axons by length and explain why.

Parasympathetic division • 4 questions**Q06 • DOK 1 • Recall**

Where does the parasympathetic division originate, and what is its alternative name?

Q07 • DOK 1 • Recall

Where are parasympathetic ganglia located?

Q08 • DOK 2 • Apply

Compare parasympathetic preganglionic and postganglionic axons by length, and explain why.

Q09 • DOK 1 • Recall

Which cranial nerve carries most of the parasympathetic outflow to the thorax and abdomen?
