

Workbook: Blood Vessel Disorders

Week 3 workbook · BIO 004 Human Anatomy · Dr. Sharilyn Rennie · Solano Community College

A focused workbook on the structural anatomy underlying common blood vessel disorders: atherosclerosis, aneurysms, varicose veins, deep vein thrombosis, and stroke types.

How to use this workbook: Read each question carefully and write your answer in the space provided. Work without looking up the answer first. Once you have written your answer, check it against the online workbook by clicking *Reveal* on that question. Star or circle anything you missed and come back to it later in the week.

Disorders · 6 questions

Q01 · DOK 2 · Compare

Distinguish arteriosclerosis from atherosclerosis.

Q02 · DOK 2 · Apply

Describe how an atherosclerotic plaque develops in vessel wall anatomy terms.

Q03 · DOK 1 · Recall

What is an aneurysm, and what are common types?

Deep vein thrombosis (DVT) most often occurs in the deep veins of the calf. Predict why prolonged immobility increases risk.
