

Workbook: Spinal Nerves and Plexuses

Week 8 workbook • BIO 004 Human Anatomy • Dr. Sharilyn Rennie • Solano Community College

A comprehensive workbook on the four major spinal nerve plexuses and their key branches: cervical, brachial, lumbar, and sacral. Includes the main peripheral nerves and what each supplies.

How to use this workbook: Read each question carefully and write your answer in the space provided. Work without looking up the answer first. Once you have written your answer, check it against the online workbook by clicking *Reveal* on that question. Star or circle anything you missed and come back to it later in the week.

General • 2 questions

Q01 • DOK 1 • Recall

What is a nerve plexus, and why does the body form them?

Q02 • DOK 1 • Recall

Name the four major spinal nerve plexuses and the spinal levels each comes from.

Cervical plexus • 1 question

Q03 • DOK 1 • Recall

Name two important branches of the cervical plexus.

Brachial plexus • 3 questions

Describe the basic organization of the brachial plexus from spinal nerves outward.

Name the five terminal branches of the brachial plexus and what each supplies.

A 'Saturday night palsy' is radial nerve injury from prolonged compression (e.g., sleeping with the arm draped over a chair). Predict the resulting deficit.

Q07 · DOK 1 · Recall

Name the two largest branches of the lumbar plexus and what each supplies.

Question-only workbook. Write your answers in the space below each question.

Describe the sciatic nerve.

What do the tibial and common fibular nerves supply?

Common fibular nerve injury at the fibular head causes foot drop. Predict the gait abnormality and the sensory loss.
